

## **Section 11.1      Programs to help members use drugs safely**

We conduct drug use reviews for our members to help make sure that they are getting safe and appropriate care. These reviews are especially important for members who have more than one provider who prescribes their drugs.

We do a review each time you fill a prescription. We also review our records on a regular basis. During these reviews, we look for potential problems such as:

- Possible medication errors.
- Drugs that may not be necessary because you are taking another drug to treat the same medical condition.
- Drugs that may not be safe or appropriate because of your age or gender.
- Certain combinations of drugs that could harm you if taken at the same time.
- Prescriptions written for drugs that have ingredients you are allergic to.
- Possible errors in the amount (dosage) of a drug you are taking.

If we see a possible problem in your use of medications, we will work with your doctor to correct the problem.

## **Section 11.2      Programs to help members manage their medications**

We have programs that can help our members with special situations. For example, some members have several complex medical conditions or they may need to take many drugs at the same time, or they could have very high drug costs.

These programs are voluntary and free to members. A team of pharmacists and doctors developed the programs for us. The programs can help make sure that our members are using the drugs that work best to treat their medical conditions and help us identify possible medication errors.

If we have a program that fits your needs, we will automatically enroll you in the program and send you information. If you decide not to participate, please notify us and we will withdraw your participation in the program.
